BONNYDALE AUSTRALIA

Welcome to the Inaugural Bonnydale QLD Black Simmentals Bull Sale to be held at Roma Qld on Friday 25th September 2020.

This inaugural offering is of the quality buyers have come to expect from the Bonnydale Australia program, an offering that represents the principles of the Bonnydale "Triangle B" brand of Integrity, Innovation & Investment.

This catalogue harnesses the power of a combined 2,000 breeders across two states, Western Australia and Queensland and delivers sires that are backed by people with astute and practical cattle sense while utilising the benefits of science. Each sire is DNA parent verified and carries comprehensive Genomic Enhanced EPD's provided by the largest multi breed beef evaluation system in the world. The dedication, to concise performance evaluation, by all those involved with the Bonnydale Australia program ensures pedigree integrity and increased performance assurance.

Bonnydale Black Simmentals is based in Bridgetown WA and was established by the Introvigne family as a Simmental seedstock business in 1974 and while success followed the change to a total Black Simmental program began in 2006 to deliver what our bull customers required in order to meet future beef industry demands. Today the Bonnydale brand is synonymous with producing the very best Black Simmental genetics in Australia backed by unparalleled after sales service to ensure our clients stay at the forefront of a demanding beef industry. The Bonnydale genetic program is built on a partnership, supplying elite genetics, with one of the USA's leading beef industry participants, Willie Altenburg, Altenburg Simmental Ranch based at Fort Collins, Colorado. This partnership not only provides the best in USA Black Simmental genetics but utilises the extensive industry knowledge Willie has acquired over his long distinguished beef industry career.

Bonnydale WA operates 3,000 hectares in the blue ribbon agricultural region of the Blackwood River Valley across the Darling Range. The 1,000 head breeding herd consists of 600 registered stud females and an expanding 400 head commercial herd run alongside a 1,700 hectare cropping program. The annual bull sale in February each year attracts strong local and Eastern States support which has developed Bonnydale into one of Western Australia's leading seedstock operations and annual bull sales.

Bonnydale QLD was developed as a partnership between the Introvigne family and Jake Berghofer and his partner Emma Patterson. Two family operations that share the same values on Integrity, Innovation and Investment has delivered an opportunity to better service the large Queensland client base and potential market which the Introvigne family had initially developed. Jake and Emma's informed local expertise enables them to not only deliver elite genetics but strong aftersales service our clients have come to expect.

The Bonnydale QLD herd is operated over a diverse landscape ensuring the Bonnydale genetics thrive in all scenarios across Australia.

Jake and Emma operate 1,400 hectares at Kingaroy being the stud base, 1400 hectares at Toogoolawah and 16,000 hectares at Eulo in Western Queensland. The 1,000 breeder herd consists of 300 registered females and 700 commercial females. The plan is to continue building the stud herd to provide, not only increased availability of bulls, but stringent selection pressure on sires offered for sale. The herd was initially developed with the importation of elite heifers and embryos from Bonnydale WA. The Queensland herd is owned in partnership while Jake and Emma oversee the management and Mike and Rob provide expertise to the genetics program.

A strong commitment to data recording, pedigree integrity and herd health is paramount to the continued development of the program. Data is meticulously collected for birth Weight, calving ease, weaning and yearling weight, docility, carcass ultra sound scanning, scrotal size and mature cow weight. Every animal in the herd is DNA parent verified and carries Genomic Enhanced performance data (EPD's) through the American Simmental Association's, IGS Multi Breed Genetic Evaluation which has over 17.5 million animals recorded. This rigorous strategy ensures potential buyers can select and purchase with confidence the genetics they are seeking to enhance their breeding program. Herd health is a major component of the Bonnydale program so as to provide sires that will thrive throughout a diverse range of Australian environments where they may face potential disease challenges so we feel it is essential to have the bulls well prepared for anything that is thrown at them.

This inaugural offering includes 27 Black Simmental, 19 Simangus and 7 Superblacks (9% Bos Indicus). They include sons of renowned sires such as RCR Augustus R54, Bonnydale Augustus L84, Bonnydale Nashville, LRS Unlimited 752A, Bonnydale Kruger, Koch Big Timber 685D, Bonnydale SA Matauri, Bonnydale SA Tank and Superblack sire Bonnydale SB Night Rider (Superblack).

Leading the team is lot 3, Bonnydale QLD Unlimited P33 an impressive beef machine, ET bred by US sire LRS Unlimited 752A and out of elite donor Bonnydale Lil Dessi K183. Unlimited P33 provides the ideal combination of his sires power and performance with the maternal excellence of the Lil Dessi cow family.

Lot 10, Bonnydale QLD Augustus P56 is an exceptional combination of Bonnydale Augustus L84 and Bonnydale Jenny K196 that delivers on performance data a balanced sires outlook.

Lot 2, Bonnydale Nashville Q203, provides access to W/C Widetrack 694Y genetics through his sire Bonnydale Nashville N70. These exceptional genetics will only be found at Bonnydale and provide a balanced package of performance and visual appeal.

Each of these 53 sires offers astute cattle people the opportunity to secure herd improving genetics which are guaranteed for temperament, fertility and structural soundness while being backed by unsurpassed aftersales service.

HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

Welcome to the new age of selling livestock in
Australia and "Happy Bidding"

-  1 Simply go to **www.elitelivestockauctions.com.au** using your desktop, laptop, iPad, iPhone or android device
-  2 Click on the "**Sign Up**" page / link
-  3 Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer.)
-  4 Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
-  5 Click "**Register**"
-  6 You will then be notified by email that an account has been created

-  7 Once an account has been created you are all "**Set to Bid**"
-  8 Each auction can then be viewed by clicking "**Live Auction**" logo on the Elite Livestock Auctions website
-  9 Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "**Request to Bid**"
-  10 The sale agents will then approve your application to bid and on the sale catalogue you will see "**✓ Bid Request Approved**"
-  11 On Sale day simply login, click "**Enter Auction**" on the catalogue page and you can start bidding.
(There is no need for software download)
-  12 At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

BONNYDALE BLACK SIMMENTALS - THE DEPENDABLE BRAND

Integrity

1. Every animal is registered with Simmental Australia and the American Simmental Association.
2. Records taken for Calving Ease, Birth Weight, Weaning Weight, Yearling Weight, Docility, EMA, Fat, IMF& Mature Cow Weight.
3. All sale bulls semen tested and breeding soundness examined by an accredited vet.
4. No sale credits utilised ensuring every prospective purchaser is on a level bidding field.
5. All bulls covered by our comprehensive guarantee and after sales service program.

Innovation

1. Free delivery to major centres.
2. Utilisation of additional science to back every animal bred at Bonnydale (American Simmental Association's massive data base).
3. Utilising a partnership with Altenburg Simmental Ranch, Fort Collins, Colorado, USA to provide industry leading genetics.
4. Utilising Genomic testing to enhance performance data - all bulls offered with Genomic Enhanced EPDs.
5. Every stud female DNA tested with ASA's CHR program to improve cow herd genetic predictability.

Investment

1. Imported embryos from Altenburg Simmental Ranch with leading USA genetics utilised on an ongoing basis.
2. Purchase of semen rights to new proven sires.
3. All stud females registered with Simmental Australia and the American Simmental Association.
4. Regular visits to the USA to identify new genetics that will enhance our client's commercial operations.
5. Continued investment in animal recording technology and linked livestock weighing systems.

BonnydaleQLD | **Black Simmentals**

THE BONNYDALE AUSTRALIA PROGRAM

BLACK SIMMENTAL PROGRAM

In 2005 the decision was made to develop a Black Simmental program to better meet the demanding market requirements for the future of the Australian beef industry. A visit to the USA that year confirmed our belief that the Black Simmental program should be a standalone venture and not use an upgrading approach from our traditional Simmental base.

This path was taken to ensure we quickly developed a black Simmental herd which wasn't compromised by the short comings of the traditional cattle.

After visiting numerous USA herds and meeting with key members of the American Simmental Association we formed an alliance with Willie Altenburg of Altenburg Simmental Ranch, Fort Collins, Colorado. This alliance provides Bonnydale with industry leading genetics via the importation of Altenburg embryos while also utilising the vast experience, knowledge and industry contacts which Willie Altenburg has. Willie is highly regarded amongst his peers and assists Bonnydale in sourcing the latest genetics in the USA.

Why the USA? We believe that USA genetics have a much more extensive Black Simmental breeding track record and without compromise. We believe this ensures they are more suited to the Australian environment and market specifications more than other Black Simmental genetic opportunities.

All Black Simmental genetics in the Bonnydale herd are derived from imported embryos and built on utilising USA semen. The Bonnydale program is now at a stage where elite sires bred at Bonnydale provide the cornerstone mating program while new USA sires are introduced on an annual basis to supply new elite genetics. Each year embryos are purchased from Altenburg Simmental Ranch to build on leading cow families and new elite sires not available in Australia.

SIMANGUS PROGRAM

SIMANGUS PROGRAM

The Simangus program was developed alongside the Black Simmental program, sharing the same Black Simmental genetics infused with leading Angus genetics developed to optimise market suitability for those choosing to utilise Simangus sires.

The Bonnydale Simangus cow herd runs alongside the purebred herd with the same stringent selection criteria. New Angus genetics are introduced annually via artificial breeding through the purebred and Simangus herds. This ensures the very best genetics underpin the Simangus program which provides varying percentages of both breeds to suit customer requirements. The Bonnydale WA commercial operation utilises 100% Simangus females mated to a blend of Simangus and purebred Black Simmental sires with strong industry demand for the progeny (feedlots and grass fatteners).

SUPERBLACK PROGRAM

"Superblacks" is a registered trademark owned by Introvigne Grazing Company.

These cattle are being developed to cater for customers requiring sires that can handle the toughest of conditions that Australia presents our cattle breeding industry. They combine exceptional performance and carcass attributes with demanding environmental adaptability. The genetic make-up combines the best of the Black Simmental and Bos Indicus traits delivering on the benefits of hybrid vigour. These advantages are well known and these cattle will deliver over any breed. Over several years we noticed Bonnydale Black Simmental bulls being used over Brangus and Droughtmaster females with great success. Our investigations revealed the potential for Black Simmental sires with some Bos Indicus content that would provide the performance of the Black Simmental with the hardiness of Bos Indicus. We have been encouraged by our findings which have proven that just like Simangus cattle, Black Simmental and Bos Indicus cattle also share complimentary genetics which produce progeny of a consistent type. The best Bos Indicus sires (Brahman & Brangus) are used on our leading Black Simmental females. The continued development of new lines to deliver increased numbers will provide an increased supply of specially selected quality sires into the future.

COVID-19

Following announcements from the Australian Government about local government community facilities, the Roma Saleyards remains open for business and continues to encourage healthy competition at its annual Stud Stock Sales. However, increased measures are being introduced to ensure that only essential participants are onsite.

The health and wellbeing of registered buyer, agents and workers is our highest priority. To ensure their safety. Council are advising that entry to the Roma Saleyards for stud sales should be limited to essential attendees, which will be determined by the duty agent hosting the sale.

Anyone experiencing cold or flu symptoms are requested to stay away from the facility altogether.

Every attendee will be required to register their attendance and complete a COVID-19 declaration with the duty agent before being permitted entry (including all workers). If an attendee's presence is deemed non-essential, entry may not be granted.

Once onsite, attendees must practise social distancing by creating a 1.5m distance from others, exercise good hygiene. i.e. wash hands with soap and water for at least 20 seconds and use hand sanitiser (which has been placed in key locations).

Visitors from the same household will be permitted to sit beside each other. In all other circumstances the 1.5 distancing requirements will apply.

Additional measures include the availability of disposable gloves and masks and increased cleaning during peak periods.

The Roma Saleyards eatery will seat a maximum of 20 people at any one time and take-away food will be available from the canteen (near the Interpretive Centre).

We recognise that the management of this pandemic is continually evolving, with measure that can sometimes change on a near-daily basis. We will continue to monitor and implement any recommendations and control measure advised by the Australian and Queensland Governments.

AMERICAN SIMMENTAL ASSOCIATION

QUICK REFERENCE TO ASA EPDS AND \$ INDEXES

Expected Progeny Differences (EPDs):

EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists.

A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

Listed below are the units ASA EPDs are expressed in:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

Back Fat (BF): Inches of backfat.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Yield grade score, the lower the better.

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

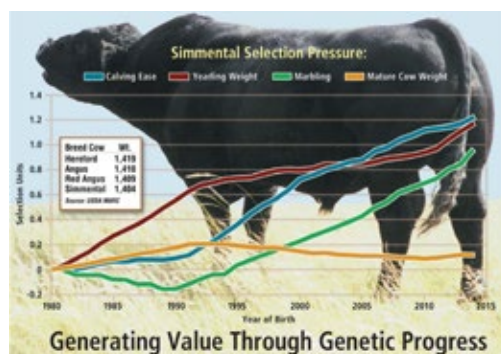

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI.

Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$).

A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

The genetic trends displayed right have a direct impact on the Bonnydale herd because we have chosen to exclusively utilise superior USA Black Simmental genetics.

QUICK GUIDE TO American Simmental Association EPD's

There are two percentile tables to consider, a Purebred table and a Hybrid table
Utilise the Purebred table for Purebred bulls and the Hybrid table for SimAngus bulls
All bull's EPD's are directly comparable , the percentile ranking is used to compare Purebred to Purebred and SimAngus to SimAngus

SPONSORING THE
LUCKY BUYER PRIZE

THE SMART START FOR YOUNG CATTLE.

What does an extra 5kg/head mean to you?

That's the difference making the smart choice for worm control in young cattle can have on productivity!

In a recent, multi-farm, study, weaners treated with Eclipse® - Australia's only dual active, broad spectrum pour-on – gained on average 5.1kg more than those treated with a single active ML over a period of 90 days¹.

For effective worm control in young cattle, choose your drench with confidence. Choose Eclipse for smarter productivity.

**FOR MORE INFORMATION, CALL 1800 808 691

SPONSORING THE
TOP PRICE BUYER PRIZE

Leptospirosis

can put you

flat on your back

for months.

Most beef producers know leptospirosis can damage the performance of their herd, but many forget it can also make people extremely ill as well. If you pick up lepto when handling cattle, you could be out of action for months with severe flu-like symptoms that often develop into an ongoing chronic fatigue like illness. Who would look after your property if that happened? Protect your herd, your family, employees and yourself. Vaccinate your cattle with Ultravac® 7in1.*

Protecting much more than cattle.

*See product leaflet for details of administration and product claims. For more information talk to your Zoetis Cattle Product Specialist on 1800 814 883. © 2013 Zoetis Inc. All rights reserved. Zoetis Australia Pty Ltd

AGENTS REBATE

A 3% rebate will be paid to any Outside Agent who introduces new clients to the stud in writing to both the Vendor and their Agent 24hrs prior to the sale.

The Agent must accompany and assist their client on the sale day.

FREE DELIVERY TO MAJOR CENTRES

The vendors will provide free delivery to major centres for bulls purchased at auction.

The vendors will deliver bulls as soon as possible after the sale.

INSURANCE DISCLAIMER - Insurance risk of stud animals sold at auction transfers to the purchaser at the fall of the hammer including animals remaining on the vendor's property. Purchasers therefore are advised to insure their animals at the completion of the sale. Stud Animals are not covered by commercial livestock insurance at any point.

TOP SELLING BONNYDALE NUKARA – SEMEN AVAILABLE

NUKARA

29SM0493

BONNYDALE NUKARA (P) (AI) (B)

Reg No.	MBBPN073
Born	23/01/2017
BW	36kg
Y/365	616kg
21mo Wt	875kg
12mo SS	44cm
Poll	Homo Polled
Colour	Homo Black
Grade	Purebred
FS	6

- Nukara was the top selling bull, at \$19,000, at the 2018 Bonnydale Sale
- Featuring impeccable structure, sound, well shaped feet with good heel depth
- His EBV should identify him as a safe CE bull. Initial calving in the field confirm this. He is a heifer's first calf
- His depth, muscle, body capacity and strong top are the features that many admire, combined with his docile nature
- His sire is the Australian highest selling Black Simmental bull
- His grand dam is the EBV profile cow, Georgia
- Nukara is the no-holes homo polled, homo black purebred Simmental the industry has been looking for!
