ENDORSED BY

NO SALE CREDIT POLICY

Bonnydale Black Simmentals continues its policy of not utilising sale credits, therefore prospective buyers at Bonnydale's Annual On-Property Bull Sale can bid with confidence and rest assured no one bidding at the sale has a credit inducement providing them with an unfair bidding advantage.

SALE DAY SAFETY DISCLAIMER

Please be advised when entering the pens people must be aware of the potential risk involved and enter at their own risk.

Children under the age of 16 are not permitted to enter the pens on sale day. Visitors must use common sense when entering the pens and be mindful of all the bulls in the pen and other visitors inspecting bulls.

While all care has been taken when selecting bulls for sale to ensure quiet temperament under normal handling circumstances they have not been accustomed to large numbers of people in their vicinity.

Bonnydale and Elders staff will be available on sale day to assist you when entering the pens or to move the bulls closer should you prefer to inspect the bulls from outside the pens.

LUNCH AND REFRESHMENTS

Inspections begin at 10.30am, complimentary morning tea is available.

A complimentary roast beef lunch and refreshments will be available from 12 noon prior to the sale start at 1.00pm WST.

Complimentary refreshments will follow the sales completion, we hope you will join us.

AGENTS REBATE

A 3% rebate will be paid to any outside agent who introduces new clients to the stud in writing to both the vendor and Elders 24 hours prior to the sale.

The agent must accompany and assist their client on sale day.

FREE DELIVERY AUSTRALIA WIDE

The vendors will provide free delivery, to all mainland states, for bulls purchased at auction.

Interstate delivery will be to the nearest major Livestock Selling Centre to the purchasers property.

In Western Australia the vendors will deliver bulls as soon as possible after the sale to the purchaser's property.

BONNYDALE'S HERD PROTOCOLS

All bulls semen tested by Nutrien Breeding Services.

All bulls will have been ultrasound scanned by Max Bowman prior to sale.

All bulls carry the Zoetis Immune Ready protocol and tested negative for BVDV.

All bulls vaccinated with 7in1, Pestiguard, Vibrovax, Longrange (Botulism), Bovillus and Rhinoguard.

All bulls drenched with Cydectin Platinum on 20th January 2026.

BULL GUARANTEE

All bulls are guaranteed for temperament, structural soundness and fertility for a period of two years, the exception being if the problem is caused by injury or disease.

Customers are asked to contact Bonnydale as soon as an issue arises. If the bull needs to be replaced Bonnydale will select an appropriate replacement commensurate to the breeding and value of the bull to be replaced.

INSURANCE

Ownership of the bull transfers at the fall of the hammer. The vendors will take all care and no responsibility until the bulls are delivered.

We recommend insuring your purchase on sale day at the conclusion of the auction. An Elders Insurance representative will be in attendance.

Elders do not accept any written or verbal instructions for any insurance requirements on Stud Stock animals. Please contact your own insurer direct.

Bonnydale Black Simmentals will retain 25% semen and marketing rights of all bulls offered in this catalogue.

Not Bound By Tradition

Welcome to Bonnydale Black Simmentals 30th Annual On-Property Bull Sale.

We continue striving to advance a genetic package that balances calving ease, powerful growth, maternal strength and carcase excellence. This is confirmed by our strong EPD trends and the noteworthy comparison of our sale team EPD's with the breed average.

We are humbled by the ongoing positive support we have received from our valued clients. This provides our team with the energy and drive to continue pursuing the genetic advancement to deliver an ever improving product. With a large herd of registered females we can retain a large group of heifers each year and objectively develop them to continually improve the cow herd. This single minded approach has allowed us to develop an elite cow herd that underpins the bulls we offer.

To enhance the power of our cow herd we stack generations of elite specially selected USA AI sires that deliver consistency across our herd and increasingly in that of our clients herds that value the Black Simmental Angus cross cow. Each year Bonnydale secures elite USA sires with the very best EPD's and appropriate phenotype. Added to this are the elite specifically bred embryos from alliance herd, Triangle J Ranch, in Nebraska. This philosophy ensures that our genetics improve at a rapid but market driven pace.

With pedigree integrity paramount, each calf is DNA Parent Verified, without both parents being verified that female will not enter the herd and those bulls will never be sold. In addition each of the selected animals must have Genomic Enhanced EPD's to increase data integrity.

Utilising Genomics has allowed us to place emphasis on optimising marbling, a driver of beef demand. This is blended with multi trait selection to ensure maternal excellence including female fertility and moderate mature cow size. An important part of the equation is strong efficient growth and all-around carcase quality; these are seen as paramount in delivering the overall premium package.

Bonnydale's selection standards for birth weight have not compromised growth traits thereby maintaining strong calving ease while continually moving the growth benchmark forward. While the dominant Angus breed steadily increases mature cow size, Bonnydale's Black Simmental has increased calf growth without increasing mature cow weight or birth weight. It is this balanced principle that sees strong demand for Bonnydale stud sires from Australian seedstock breeders.

These dedicated breeding objectives culminated at the 2025 Perth Royal Show with Winston 18, Bonnydale's 18 month old Simangus Black Dog Ride charity steer taking out the Champion Heavyweight carcase. With a dressing percentage of 58.8%, fats of 8mm and 10mm, EMA of 110cm² and an outstanding Marble score 3. These results are consistent with progeny from Bonnydale sires either off grass or the feedlot delivering premium carcasses that hit the specs at an early age.

Our forward thinking clients are achieving excellent results, delivering increased profits, by utilising the value of crossbreeding. This is generally achieved utilising Black Simmental and Angus which share complimentary genetics, without trait antagonism. The result delivers consistent market driven Simangus progeny and elite Simangus females. Black cattle with optimal market suitability and verified by every crossbreeding research trial reported in the past 60 years.

Bonnydale's 2026 offering on Monday 9th March is testament to our stringent breeding principles aimed at delivering market driven sires for a demanding industry. Commercial cattle producers must ask themselves what drives their business bottom line. It is not by following the effortless but deficient purebred culture but instead utilising the enormous benefit of crossbreeding for hybrid vigour and maternal hybrid vigour. The pork, chicken and lamb industries have utilised the benefits of crossbreeding for decades with colossal success in both productivity and consumer satisfaction.

Using a Simangus cow (Black Simmental x Angus) provides unprecedented maternal value that has scientifically been proven to deliver up to 25% more lifetime productivity compared to her purebred counterpart. Then comes the crossbred Simangus calf delivering significant production and carcase benefits, again scientifically proven and continually delivering in commercial feedlot and grassfed performance.

Black Dog Ride charity steer, Winston 18 is a proven result of the opportunity that awaits those that seek greater profits from their beef program utilising either a Simangus cow or a Black Simmental or Simangus sire over Angus cows.

We encourage you to join us on Monday 9th March 2026 to view a superb line-up of profit driven sires and partake in our sale day hospitality.

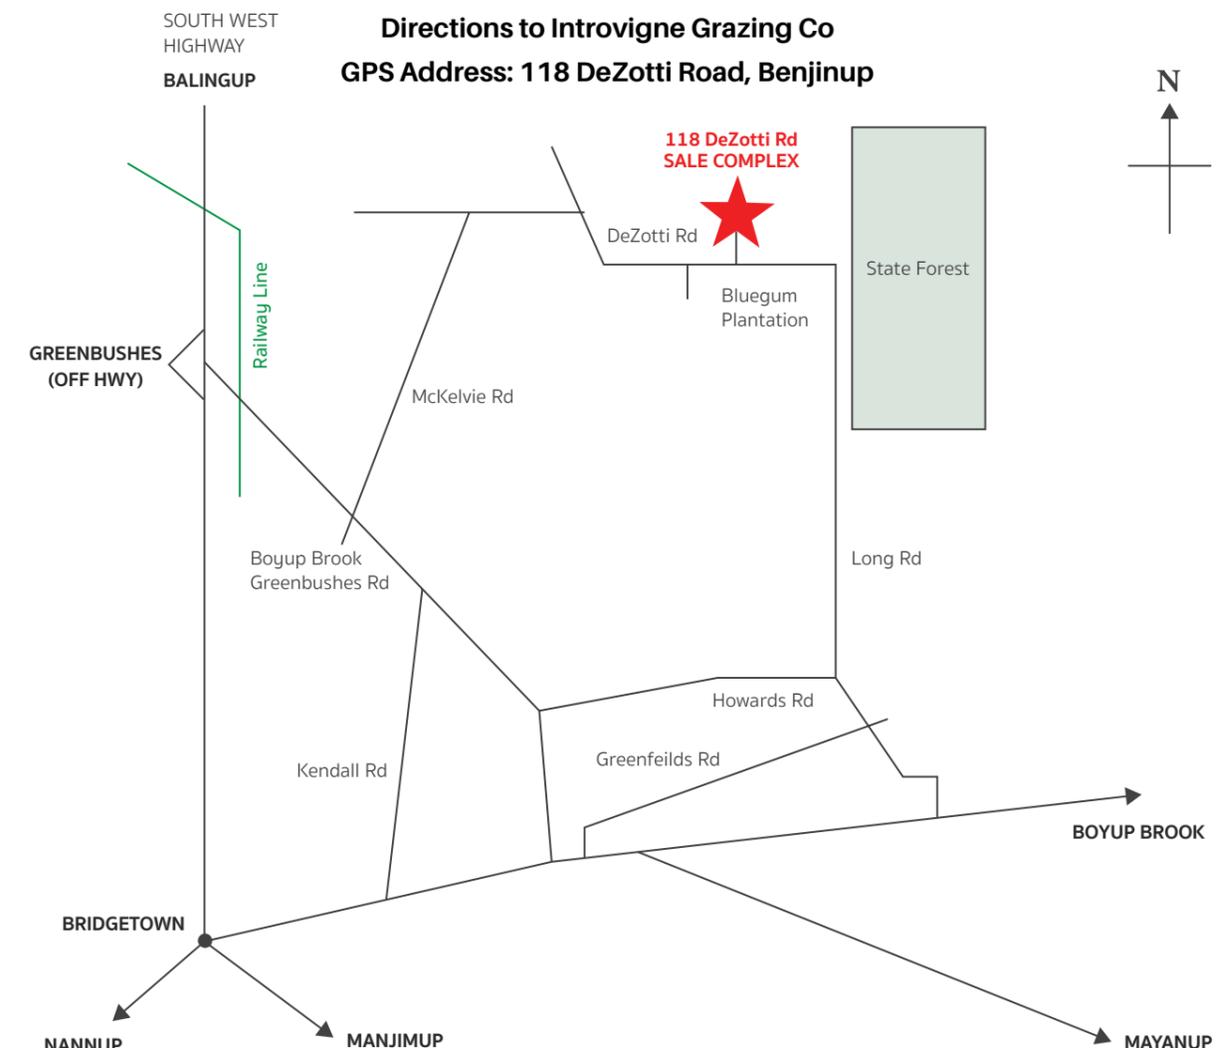

Regards
The Bonnydale WA Team

Bonnydale Black Simmentals

PROVEN, POWERFUL,
PREIDCTABLE GENETICS
BACKED BY SCIENCE & DATA

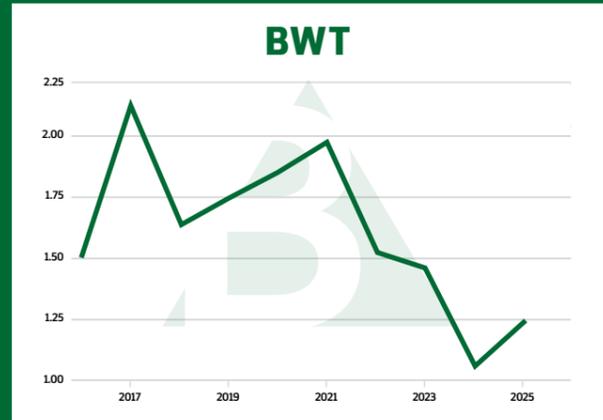

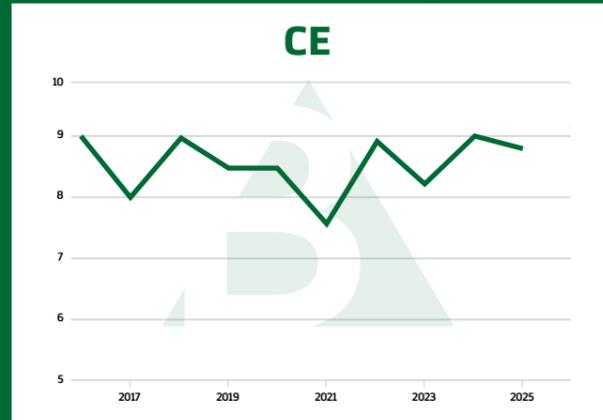

WHY BONNYDALE SHOULD BE YOUR SOURCE OF SUPERIOR SIRES:

- Largest Black Simmental seedstock business in Australia

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

7

Fill in buyer details and once completed go back to Dashboard.

2

Select “**Sign Up**” in the top right hand corner.

8

Complete buyer induction module (approx. 30 minutes).

3

Fill out your name, mobile number, email address and create a password.

9

AuctionsPlus will email you to let you know that your account has been approved.

4

Go to your emails and confirm the account.

10

Log in on sale day and connect to auction.

5

Return to AuctionsPlus and log in.

11

Bid using the two-step process – unlock the bid button and bid at that price.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Matt Boyle – has been more than impressed with the result he is achieving with his Simangus calves.

Bonnydale M403 still working at 10 years of age on Nallan Sation, Cue.

Early setbacks determine new direction

By KYAH PEETI

AFTER leaving school at just 15 years old, Darren Wolfe started working on his family's Bornholm-based sheep property alongside his late father, Bill.

A year later, Bill sadly passed, and Darren, along with his mother Julie took on the responsibility of the farm.

Soon after, the team faced footrot disease for the second time throughout the late 1990s and early 2000s, and a decision was made to diversify.

Deciding which direction to steer the business towards next was an easy one.

As a result, the Wolfes purchased nine mated cows, but only six live calves were born, delivering a calving percentage that made for a discouraging start to the cattle enterprise.

Regardless, the pair sold the calves and purchased three mated heifers, and a cycle began.

By the time Darren Wolfe

□ Darren Wolfe (left) and his son Jed at the family's 450 hectare property at Bornholm, where he also farms with his wife Sam, as third and fourth generations.

was in his early 20s, he took over the business and had comfortably built up herd numbers to 50 head.

Over the years, Mr Wolfe

tried and trialed many breeds and crosses, before he finally settled on Angus dams joined to Black Simmental sires, and sold

up his last mob of sheep in 2023.

Fast forward to 2025, Mr Wolfe runs just short of 350 breeders across 450 hectares,

made up of the original titles, and new blocks purchased throughout the years, alongside wife Sam and son Jed, as the third generation

and fourth generation at Bornholm.

"We hope to expand to somewhere near 400 breeders in the next 18 months," Mr Wolfe said.

"We breed all our own replacements now and have been using some SimAngus bulls to do so, which are all purchased from the Introvigne family's Bonnydale Black Simmental stud at Bridgetown."

Having finally found the breed that works best for them, the Wolfes praise both the breed, and genetics they use, which complements their program well.

"I really like the body depth of the animals, as well as their performance, particularly after weaning," Mr Wolfe said.

"Their temperament is another big tick for us here."

"I also like the advice and volume of information available from the Bonnydale stud, which assists us in what we're trying to achieve."

The Wolfes put strong emphasis on putting Simmental genetics right through their female herd in future.

"This will give us more longevity, fertility and ability to do well in tough seasons,

□ The Wolfes run just short of 350 breeders and hope to expand to 400 head in the next 18 months.

easier, as well as better body shape," Mr Wolfe said.

"We plan to breed our replacements using Angus bulls, and stick with Black Simmentals as terminal sires."

The breeding program at the Bornholm property is currently supported by 12 Bonnydale bulls, carefully selected using visual appraisal and figures, as well as advice from the stud itself.

"The Bonnydale sale cata-

logue provides a lot of information," Mr Wolfe said.

"Mike Introvigne, is very approachable and has a wealth of knowledge, and that combined with our own buying requirements helps guide our decisions."

To better suit the later calf market, and utilise summer feed, the Wolfes join in June for nine weeks and calve down from March to May the following year.

"Currently we have 12 bulls and generally aim to run one bull per 30 cows at joining," Mr Wolfe said.

"We keep joining at nine weeks as we've found it works best for us and gives us a nice even line of calves."

"Calving in the March, April and May period allows us to target that later calf market and utilise our summer feed as best we can."

"In future we hope to

irrigate our fodder crops to supply out-of-season finished calves.

"This will be supported by a potential split-calving."

"We are still in the planning stages."

The Wolfes' aim is to be able to supply a grass-finished, non lotfed animal for the domestic market.

After the calves are weaned in December, they are put back out to pasture for finishing.

"We grow millet through the summer if the season permits, which is mainly for the weaners," Mr Wolfe said.

"We are constantly improving pasture mixes, and growing a lot of oats and ryegrass."

"We rotate the calves regularly, with timeframes dependent on paddock and season."

"Currently, we lease out some of the farm for seed potatoes on a five-year rotation."

"We are constantly reseeding, and looking for better winter grazing varieties."

"We also grow winter oats, which on the right year can give us good green bulk feed through the tight feeding spots."

Family's tradition carries on

Donnybrook farmer Brendon Giudici is carrying on with his family's 70-year tradition of producing productive cattle through maternal hybrid vigour for sustainable beef production.

With the aim of evolving the herd from its traditional Simmental cross Shorthorn make-up to a pure Black Simmental and SimAngus progression, Mr Giudici's goal has been to tighten the weight ranges while improving carcass and structure to provide a more consistent product.

"We're aiming for an all-black cow herd with an even British-breed content," he said.

A graduate of WA College of Agriculture — Denmark, Mr Giudici returned to the family farm full-time in 2013 after spending time working at various outside farm enterprises to grasp a thorough understanding of a variety of production pathways.

His parents used the Glen Mervyn Dam water to produce pumpkins for 25 years alongside their beef production but his motive was to eliminate the labour-intensive component, leasing more land, and to concentrate on adding further input into maximising pasture, silage, and hay production.

From his deeply rooted upbringing of working in the humble and highly respected pumpkin patch, Mr Giudici visualised the potential offered by the local genetic resources provided by the Introvigne family, who run the Bonnydale Black Simmental and SimAngus studs.

"They are producing a

One of the Giudici family's maiden SimAngus cows with a 385kg Black Simmental-sired steer destined for feedlot finishing. INSET: Donnybrook cattle producer Brendon Giudici, who runs the family farm with his mother Bev Giudici. Pictures: Bob Garnant

valuable genetic pool which allows us to continue matching the appropriate cattle type with some British breed infusion that is productive and suitable to our environment," he said.

"I am aiming for an efficient mature cow weight, currently average around 660kg-670kg across our herd of 230 autumn calving cows."

"Our herd is about a 50-50 split between Black Simmental and SimAngus sires, giving us an option to increase or decrease Angus content as required."

Mr Giudici said last year they

joined two yearling bulls and in one mob of 59 cows, only one was empty after an eight to nine-week tight joining period.

"We select bulls based on pedigree, moderate birth and balanced figures for growth, carcass and maternal traits," he said.

"The production of calves is seen as a product rather than a commodity. They receive a Bovilis MH and IBR vaccine to be feedlot-ready, and weaning is approached as an education process — last year's crop of steers averaged 373kg at weaning

and heifers weighed in at 355kg. "The majority of the steers and some heifers are sold to the Kylagh feedlot, and we maintain an option to sell lighter weights off grass to the supermarket trade."

Kylagh feedlot general manager Ivan Rogers said the Giudici family's cattle were in the top 25 per cent cohort for their class type performance in the feedlot.

"Most recent results from last year show that the cattle had attained 1.85kg gain per day HGP-free," he said.

"They are quiet to handle and adapt well into the feedlot and the finished product suit our brand partners."

Mr Giudici said his homegrown grass-fed yearlings averaged 285kg with 10mm of fat, sold mostly to Coles.

He said Bonnydale stud manager Rob Introvigne was a valuable source of information.

"We are very lucky to have this leading seedstock business in WA to help support our beef production into a more sustainable enterprise," Mr Giudici said.

DW & SM MEADE, NARRIKUP

The Meade family exhibited the champion pen of steers at the Elders Great Southern All Breeds Feeder & Weaner Show Sale in Mount Barker on 27th November 2025.

The winning pen of 10 Black Simmental cross weaner steers, which averaged 373kg liveweight, were judged by Brett Page (left) A O'Meehan & Co feedlot manager, Borden. Wayne Mitchell Elders Albany Livestock Manager congratulates Wayne Meade, daughter Natalie Kinnane-Meade with her daughters Freya and Ava.

The pen of steers sold for \$1,738 and 466c/kg.

TESTIMONIALS

TIRANO FARMS

"Hi Mike and Rob,
We sent a load of 38 calves from our place today av 489kg with 13 over 500kg. We had already sent the 9 heaviest all over 500kg last week to top up a load from Dads. So far 25 calves over 500kg from all farms (10%). Avg daily gain in the last week 1.6kg for the mob - not too bad since we don't have much green grass for them."

LE & EF BROOKES

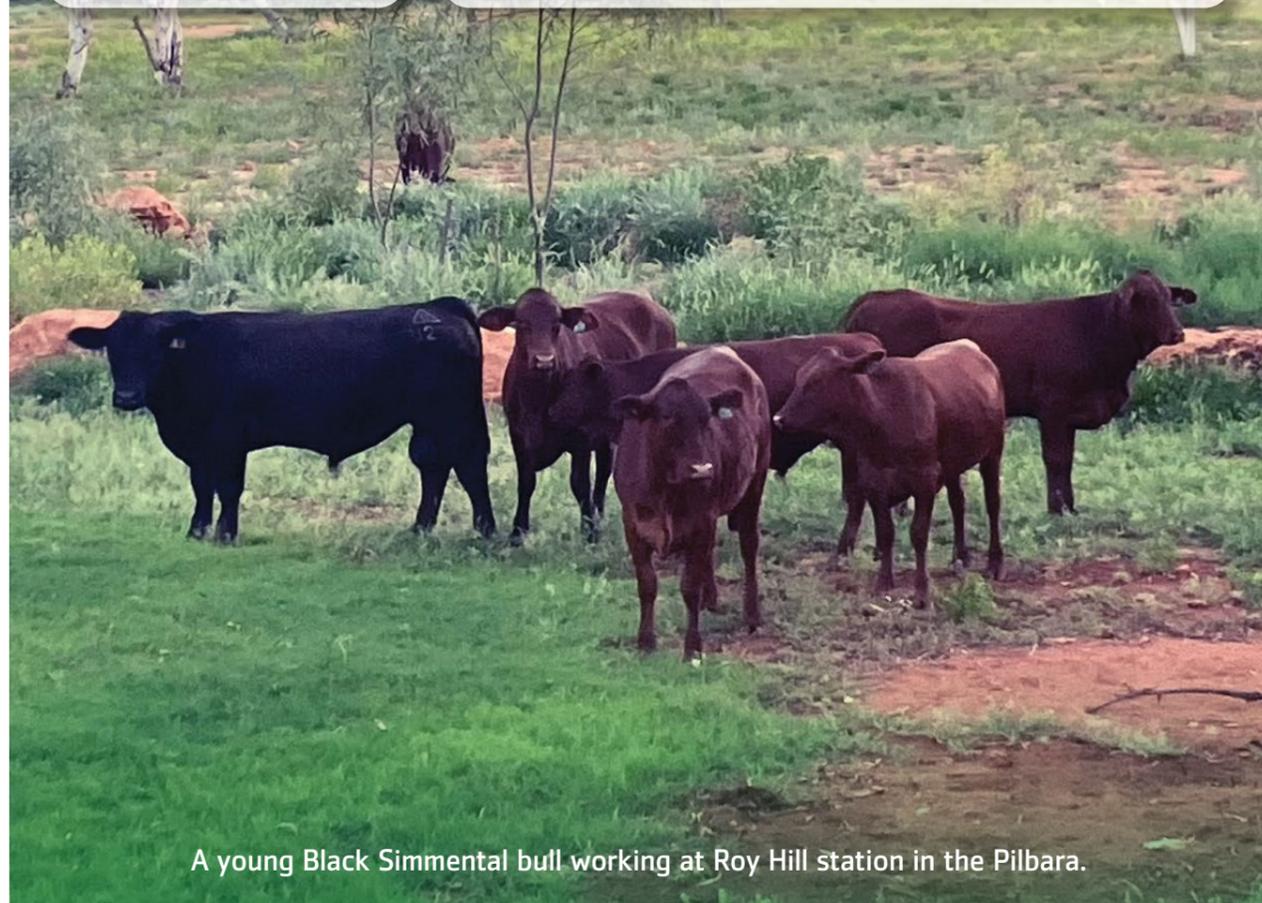

"These exceptional calves are a result of using Bonnydale bulls over the years and developing a Simangus cow herd from our original F1 cows".

Les, Elaine & Natalie
LE & EF Brookes
Yornup, WA.

H WOLFE & CO

"Quality bulls backed by quality data with an emphasis on temperament is achieving great results in our herd".

Darren Wolfe

The Simangus cow provides 25% more lifetime productivity than a straightbred cow

SIMANGUS COW & CALF

A typical Bonnydale commercial Simangus cow with Simangus calf at foot.

Cow 4.5 years old weighing 646kg live weight.

Third calf born in March 2025 and weaned on 24th November at 457kg liveweight.

**More Kilos = More Dollars
in your pocket, isn't that
why you produce beef.**
